

LEARN TO LEAD COURSE KIT LIST

PERSONAL KIT

we're not suggesting you to go out & spend all the money on all the latest technical kit, this is just a sensible list that in terms of keeping safe & comfortable, works. In the same vein though, the weather on the day & the time of year will be big factors to help decide what you will & won't pack. Ascent guides are more than happy to give advice and/or answer any questions you have regarding kit.

CLIMBING CLOTHES

stretchy synthetic man made material & try to avoid cotton, wool etc. (especially on a wet day)

MID LAYERS – for the top half to help regulate temperature

WARM TOP LAYER – Something warm & light, which you can wear over everything but also can be stuffed away in your rucksack or attached in a stuff sack to your harness

JACKET – A “belay jacket” or warm “soft shell” do a great job

WATER PROOFS – top & bottom “hard shell” Water resistant (nothing is water proof forever) layer.

APPROACH SHOES – footwear that is comfortable with good tread & suitable for potentially attaching to your harness, so you can avoid walking on the crag in your climbing shoes.

CLIMBING SHOES – if you don't already own your own pair this can make or break a climbing experience so whether your hiring or buying a pair, go & try them on! A good combination of comfort & a snug fit is essential!

WATER BOTTLE/FLASK – 1 litre minimum

FOOD – bring the stuff you love and good grazing snacks

RUCKSACK – 40lt minimum, along with your personal kit. There may be group kit that needs to be shared out. 40 litre is a great size for most courses

HAT, GLOVES, SNOOD – beanie hat works best as they can fit under a helmet.

SUN PROTECTION – sun hat, sunglasses, sun cream

MEDICATION – personal medication, small first aid kit

WE PROVIDE ALL TECHNICAL & SAFETY EQUIPMENT.

**But on the next page you can find a comprehensive
“learn to lead” climbing rack. ->**

LEARN TO LEAD COURSE KIT LIST

PERSONAL CLIMBING RACK

HELMET – A climbing rated helmet is essential

HARNESS – like climbing shoes its worth trying different harness on, focusing on comfort, size & because we are trad climbing, loads of gear loops

CHALK BAG – for improving grip

NUTKEY – We recommend the WILD COUNTRY Stainless steel Pro Key

2 PRUSSIKS – equipment for abseils. 5-6 mm cord, best stored on a dedicated screwgates

BELAY PLATE & SCREWGATES – any belay plate combined with a HMS carabiner

4X SCREW GATE CARABINERS – we recommend 1 big HMS carabiner & 3 D-shape for personal climbing

NUTS – a set of climbing nuts. We recommend DMM Wallnuts 1-11 on a snapgate carabiner

CAMS – a set of climbing cams. We recommend DMM Dragons 0-6

HEXES – a set of climbing hexes. We recommend DMM Torque Nuts 1-4 on a snapgate carabiner each.

12X QUICKDRAWS – We recommend DMM Phantoms. 4 x 12cm, 4 x 16cm, 2 x 25cm & 2 x 60cm

CLIMBING ROPE – a 60m single rope is a good option to suit all your climbing. Half ropes are great for trad climbing, but less for indoor & sport use.

2X 120CM SLING – We recommend?

240CM SLING – ?
